

# NetBurner Product License Datasheet

Effective February 1, 2008 - Prices are in US Dollars

## Key Points

- Build your own hardware using NetBurner hardware, software, and tools
- Build unlimited products — royalty-free
- No recurring development seat costs
- Includes source code, schematics, and layout design files
- Single vendor solution
- Readily available commercial CPU from Freescale - no custom chips or "fab-less chip vendors"
- Complete support from people who know your hardware and software

## Overview

NetBurner development kits enable you to quickly and easily create custom applications. You then have 3 options for producing your product:

1. Purchase standard hardware
2. Contract NetBurner to build your custom hardware
3. License the software and build your own custom hardware

There are no additional costs or license fees for any hardware purchased from NetBurner. A license is required only if you build your own processor hardware.

## NetBurner Product Licenses

The NetBurner license agreement includes rights to the hardware design, TCP/IP protocol suite, system software, debug monitor, and development software. This license is royalty-free, so you may build an unlimited number of products based on the processor design. You may also freely distribute end-user utilities such as AutoUpdate, SerialLoad and IPSetup. The included source code files give you a great head start and the confidence of using a proven integrated hardware and software design. NetBurner also includes the schematic and layout design which provides security against product obsolescence. All Freescale ColdFire Design licenses also include an optional schematic review of the NetBurner portion of your project.

Table 1: TCP/IP Protocol Suite & Optional Software Modules

NetBurner TCP/IP Protocol Suite				Optional S/W
ARP	FTP / TFTP	Multihome	TCP	SSL Option <sup>1</sup>
DHCP / BOOTP	HTTP / Web Server	NTP	Telnet	SNMP Option <sup>1</sup>
DNS	IP	Ping / ICMP	UDP	
E-mail / POP3 / SMTP	Multicast / IGMP	PPP		

Table 2: System Software, Development Software, and Deployment Tools

System Software	Development Software	Deployment Tools		
NetBurner uC/OS RTOS	NetBurner's Eclipse IDE	AutoUpdate	TaskScan	UDP Terminal Tool
Flash File System	Graphical Debugger	IPSetup	SmartTrap WinAddr2Line	TFTP Server
C/C++ Compiler and Linker	Command Line Tools	MTTTY Serial Terminal	SerialLoad	

Table 3: NetBurner Multiple Product Site License Price List

Product	Price	Product	Price
Freescale ColdFire 5208 Designs	\$29,500 USD	Freescale ColdFire 5206e Designs	\$29,500 USD
Freescale ColdFire 5213 Designs	\$4,900 USD	SNMP V1 (Includes 4 hours of tech support)	\$495 USD
Freescale ColdFire 5234 Designs	\$29,500 USD	SSL 3.0 Server, RSA & (A)RC4	\$5,900 USD
Freescale ColdFire 5270 Designs	\$29,500 USD	SSL 3.0 Server, RSA & (A)RC4 - NetBurner Module License	\$495 USD
Freescale ColdFire 5272 Designs	\$29,500 USD	Annual Support and Maintenance <sup>1</sup>	15% of License Cost <sup>2</sup>
Freescale ColdFire 5282 Designs	\$29,500 USD		

## Note:

1. Optional Software Modules may be purchased in addition to a Freescale ColdFire Design License.
2. Cost of Annual Support and Maintenance is 25% if not current.
