

## **Product Discontinuation Notice: NBWIFIUG-100IR**

NetBurner is dedicated to supporting the product and service needs of our customers, and it is our policy to support our products as long as possible. While we thoroughly review each component vendor, we cannot eliminate the possibility of component obsolescence. In this case the vendor for our wifi chipset, Realtek, has discontinued the key components used in our NBWIFIUG-100IR wifi module without providing adequate notice to allow us to develop a suitable replacement in time for a smooth transition.

The replacement is currently in development and will provide WPA2 security as well as b/g/n capability. It is our goal for this replacement to be mechanically and programmatically identical to the NBWIFIUG-100IR, but we cannot guarantee that until our development and testing is complete. It is our goal to have prototype units as soon as possible.

We do have inventory of the NBWIFIUG-100IR, and will sell these units at the discounted price of \$19 per unit until the inventory is depleted.

We apologize for this inconvenience and will do our best to provide an alternate solution as soon as possible.
