Effective July 06, 2017 - Prices are in US Dollars

NetBurner

Key Points

- Build your own hardware using NetBurner hardware, software, and tools
- Build unlimited products — royalty-free
- No recurring development seat costs
- Includes source code, schematics, and layout design files
- Single vendor solution
- Readily available commercial CPU from Freescale - no custom chips or "fab-less chip vendors"
- Complete support from people who know your hardware and software

Overview

NetBurner development kits enable you to quickly and easily create custom applications. You then have 3 options for producing your product:

- Purchase standard hardware
- Contract NetBurner to build your custom hardware
- License the software and build your own custom hardware

There are no additional costs or license fees for any hardware purchased from NetBurner. A license is required only if you build your own processor hardware.

Product License

NetBurner Product Licenses

The NetBurner license agreement includes rights to the hardware design, TCP/IP protocol suite, system software, debug monitor, and development software. This license is royalty-free, so you may build an unlimited number of products based on the processor design. You may also freely distribute end-user utilities such as AutoUpdate, SerialLoad and IPSetup. The included source code files give you a great head start and the confidence of using a proven integrated hardware and software design. NetBurner also includes the schematic and layout design which provides security against product obsolescence. All Freescale ColdFire Design licenses also include an optional schematic review of the NetBurner portion of your project.

Table 1: **TCP/IP Protocol Suite & Optional Software Modules**

NetBurner TCP/IP Protocol Suite				Optional S/W
ARP	FTP / TFTP	Multicast / IGMP	Ping / ICMP	SSL Option[1]
DHCP / BOOTP	HTTP / Web Server	Multihome	PPP	SNMP Option[1]
DNS	IP	NTP	TCP	
E-mail / POP3 / SMTP				

Note:
1. Optional Software Modules may be purchased in addition to a Freescale ColdFire Design License.

Table 2: **System Software, Development Software, and Deployment Tools**

System Software	Development Software	Deployment Tools		
NetBurner uC/OS RTOS	NetBurner's Eclipse IDE	AutoUpdate	TaskScan	SerialLoad
Flash File System	Graphical Debugger	IPSetup	SmartTrap WinAddr2Line	UDP Terminal Tool
C/C++ Compiler and Linker	Command Line Tools	MTTTY Serial Terminal	PUARTL5	TFTP Server
		UART1_RX	PUARTL4	UART 1 Receive

Table 3: **NetBurner Multiple Product Site License Price List**

Product	Price
NXP/Freescale ColdFire MCF5441X Designs	$3,675 USD plus pre-programmed SPI Boot Component
SNMP V1 (Includes 4 hours of tech support)	$495 USD
SSL 3.0 Server, RSA & (A)RC4	$5,900 USD
SSL 3.0 Server, RSA & (A)RC4 - NetBurner Module License	$495 USD
Annual Support and Maintenance	$3,675
